Staff Recognition Week

awards ceremony

May 21, 2018 | 1:30 p.m. | Jesse Hall Auditorium
University of Missouri
2018 AWARDS CEREMONY PROGRAM

WELCOME
Chrissy Kintner, Chair, MU Staff Advisory Council

CITATIONS TO PAST COUNCIL MEMBERS
PRESENTERS  Chrissy Kintner and Chancellor Alexander Cartwright
RECIPIENTS  Rebecca Bergfield, Duff Bergendahl, Carol Heffner and Christa Keers

RECOGNITION OF SERVICE AWARD RECIPIENTS
Chancellor Alexander Cartwright and
Vice Chancellor for Operations & Student Affairs Gary Ward

MAJOR MICK DEAVER MEMORIAL AWARD FOR STUDENT RELATIONS EXCELLENCE
PRESENTER  Shawn Deaver, son of the late Mick Deaver
FINALISTS  Kathy Sharp, Tara Jackson
RECIPIENT  Sarah Stone
BARBARA S. UEHLING AWARD FOR ADMINISTRATIVE EXCELLENCE

**PRESENTER** Vice Chancellor for Operations & Student Affairs Gary Ward
**FINALISTS** Tammy L. Bedford, Jennifer L. Tisone, Esther Ellis
**RECIPIENT** Tamara Regan

MU INCLUSIVE EXCELLENCE AWARD

**PRESENTER** UM System Chief Diversity Officer & MU Vice Chancellor for Inclusion, Diversity and Equity Kevin McDonald
**FINALIST** Rachel Haug
**RECIPIENTS** Lisa Scheese and Karen D. Hayes

CHANCELLOR’S OUTSTANDING STAFF AWARD FINALISTS

**PRESENTER** Chancellor Alexander Cartwright
**ADMINISTRATIVE/PROFESSIONAL** Jennifer Schnabel, Sherri Helm, Judy L. Todd
**CRAFTS/MAINTENANCE** Herman R. Smith, Lauren Nations
**CLERICAL/OFFICE** Stefanie Gray, Shawn Pallardy, Rose M. Hayden
**TECHNICAL/PARAPROFESSIONAL** Anastasia Glahn

CHANCELLOR’S OUTSTANDING STAFF AWARD RECIPIENTS

**PRESENTER** Chancellor Alexander Cartwright
**ADMINISTRATIVE/PROFESSIONAL** Angela M. Knoerr
**CRAFTS/MAINTENANCE** Fred Wyss
**CLERICAL/OFFICE** Rebecca L. Ballew
**TECHNICAL/PARAPROFESSIONAL** Lucy Urlacher
Sarah Stone’s love of theatre started with a fuse box. She was still in junior high school when a teacher asked for a volunteer to flip the circuit breakers to turn the stage lights on and off during the school play. It was a low-budget technical solution and almost certainly a fire code violation — but utterly amazing to Stone.

From the back of the room, she watched the lights go on and off at her command, saw the audience respond to the performers illuminated under the different hues, and she was hooked.

She did theater tech in high school, then majored in theater tech at Mizzou. She worked in the student-led MSA/GPC Tech, a group funded by the Missouri Students Association and Graduate Professional Council that offers staging, lighting, sound and other technical support for campus events.

In 2005, Stone returned to her alma mater to become the first full-time staff coordinator of MSA/GPC Tech. Graham Haerther joined the program in summer of 2015 as assistant coordinator.

Since 2005, the group has worked nearly 2,400 events. For Stone, the most difficult event is also the most memorable: Fall Welcome.

Fall Welcome is a week of activities set at all times of day. “It’s a massive amount of hours,” Stone says. As a leader, she won’t ask someone to do something she wouldn’t, so she works alongside the students, late into the night, weary but smiling. “At the end, we pack it up, take the trucks full of equipment back and say, ‘We survived.’ ”

Over the course of the week, Stone and Graham see their team of 15 students come together to meet challenges the students might initially have thought were too big for them. It’s a bonding experience. “They could find jobs that take less out of them,” Stone says. “But they do this because they love the team.”

She also knows the work they do is important. “We have had people who met their best friends at the midnight barbecue,” Stone says. “We had a proposal at the barbecue — those are big events. They are Mizzou.”
Mizzou K-12 is a huge, online-education program that serves students across the U.S. and in 35 other countries. A team of 180 people, mostly teachers, supports the operations. Tamara Regan is the business manager, responsible for student support services, fiscal, and HR activities.

“Everything I do, it’s all for the students,” Regan says. She feels a personal connection to the alternative education program. A homeschool graduate, Regan knows first-hand the power of non-traditional education pathways. “I don’t want to be a teacher, but I can manage the human resources to make sure the teachers get paid. I can get them the tools they need to do their job. I can remove duplications of their effort.”

That dedication was tested five years ago when the Mizzou K-12 program was shifted from MU Extension to the College of Education. The old system was paper-based, and Regan’s team had six months to convert it all online — they had to overhaul the website, bookstore, student information system, learning management system, and online tutoring and proctoring services. “Everyone said, ‘You can’t do it.’ But we did it, and it’s still going,” she says. “It’s a testament to how even small teams can get things done.”

Normally behind the scenes, Regan experienced a career highlight when she got to travel to a partner school site in Qingdao China and hand out diplomas. “I had my own interpreter and was treated like royalty,” Regan says. “I went with the mindset of, I’m going to try anything they put in front of me. I told them that, and they took it to heart. I had sea urchin, squid — lots of interesting food.”

Taking on a challenging project and embracing a new cuisine both illustrate Regan’s adventurous personality that isn’t content with the status quo. “That’s the kind of person I am — let’s not get stuck in a rut. Let’s do something different.”

MGR II Business Admin
Mizzou K-12 Online

Barbara S. Uehling Award for Administrative Excellence
Being a first-generation college student can be challenging for a freshman — something Lisa Scheese knows from experience. However, when she found the TRiO Student Support Services program at Columbia College, it became her “go-to” resource on how to navigate her new world.

Scheese’s experience with the TRiO program as an undergraduate was the driving force in her decision to work in higher education and to serve underrepresented students. She was more than a decade into her career when she had the opportunity four years ago to work for Mizzou’s TRiO program. She didn’t hesitate to apply.

TRiO is a federal grant–supported program that assists nearly 700 undergraduates from underrepresented backgrounds, such as first-generation students, low-income students and students with disabilities. TRiO is a holistically serving program that helps with many aspects of college life: academic, financial, social, career development, leadership development and cultural competency.

In addition to serving the general TRiO population, Scheese works to create awareness for this exceptional group across campus, as well as to ensure the basic needs of homeless and foster youth are met.

Although there are many administrative duties to her current TRiO coordinator position, her main focus is providing support to students and creating an atmosphere where they can be themselves.

“Our goal as a program is to make our students feel like they have a home on our campus and that they feel valued,” Scheese says. Knowing that eight of her students nominated her for the MU Inclusive Excellence Award tells her she’s on the right track.

“It shows that the program is doing what it is designed to do and that students feel valued on our campus and in the community,” Scheese says. “I feel privileged that they have singled me out for this award, but it’s the whole staff that works together to make our program a diverse and inclusive atmosphere.”
Karen Hayes has spent her adult life fighting for greater inclusion, diversity and equity at Mizzou. And she can point to exactly where it started.

As a young college student at Mizzou in the 1984, Hayes took a class entitled “Women, Race and Class,” taught by professors Dorothy Haecker and Frances Jones Sneed.

“It was seminal,” she says. “I came from a Catholic high school, a social justice background, but that was based on religion. This was about being a citizen whose voice was heard in society.”

She learned the idea of equity in that class and how standards rigidly applied to everyone, regardless of circumstance, can’t achieve equity. “We have to accept people where they’re at and help them through.”

Hayes performed well in the classroom but also put her new ideas into practice as a student and, later, as a recruiter/academic adviser in the College of Education and School of Health Professions.

She protested the university’s practice of investing in apartheid South Africa, recruited non-traditional and minority students to the College of Education and created the Dorsey Scholars Program to increase the number of underrepresented students graduating from the College of Education.

In 2016, she moved to the School of Health Professions where she advises students, including those from marginalized backgrounds. In addition, she serves on the iBelong@Mizzou committee, which is devoted to improving the school’s inclusion efforts, particularly for students from first-generation college, underrepresented, LGBTQ or low-income backgrounds.

Sometimes that means a hard look in the mirror. “The biggest piece is bringing up uncomfortable conversations,” Hayes says. “People don’t want to interrogate themselves at this level. But you can’t say, ‘I care about students,’ and not be ready to put it all on the table.”

Having served at Mizzou for three decades, Hayes has seen the incremental progress on campus — the “long game” toward greater inclusion, diversity and equity.

“So many times we get caught up in what hasn’t happened instead of what has,” she says. “This award lets me look at how much we have done and take stock of it.”
Following your passion is not always a straightforward path. Amanda Knoerr’s path to instructional design led her through middle school and high school classrooms, graduate school, a school library, back to graduate school and finally to the University of Missouri, where she works with the School of Journalism and ET@MO to help faculty and staff better integrate technology into their courses and better design their courses to support desired student outcomes.

Knoerr is an all-in kind of person. She loves instruction at all levels but found her home in higher education. After getting a master’s degree in library science and becoming a school librarian, she discovered an interest in the intersection between technology and instruction. Her second master’s degree was in instructional design. She left St. Louis, where she’d been living, and took an instructional design job at Columbia College.

She knew she had found a special job when, after helping at an event, a co-worker came into her cubicle, patted her on the back and said, “thank you.”

“Oh, man,” Knoerr thought. “I need to be in this role where I can affect positive change for students maintain a work-life balance.”

Now at Mizzou, she is a “busy bee,” working on everything from minor challenges with online learning management systems to overhauling entire classes.

She spends a lot of time meeting with professors and helping them adapt to technology changes, some of which are mandated as Mizzou moves forward. She helps them integrate the technology and rethink their teaching methods on their terms so it supports their teaching style and philosophy rather than supplants it.

She also serves on curriculum committees and helps redesign classes. “It is the best thing to blow up a course entirely and think, “What do you want the students to know five years from now? What must they be able to do? What enduring understanding about the world do you want them to take away?”

Knoerr calls herself “self-actualized” because she is doing a job that uses all her talents and skills in a natural way.

“I’m in the job I want to be in,” she says. “I’m not looking around at others — this is what I want to do.”
Everyone else has their first name on their nametag. Not Fred Wyss. He has a whole sentence: “HimynameisFred.”

It says a lot about what brings him to work every day for the past 21 years at Campus Dining Services, most recently at Tiger Avenue Deli in the Restaurants at Southwest.

Wyss is motivated to give the best customer service he can. That means not just fast and accurate service but also a caring, human touch.

“I have a concern for people,” Wyss says. “When you’re preparing their food, you have a few minutes to visit with them. When I ask them, ‘How are finals, classes, what’s new in your life?’, they know I’m not just asking questions. I care about what’s going on with them.”

And unlike the meaningless “How are you?” pleasantries most people exchange throughout the day, Wyss takes the time to listen to his students and reflect back to them so they know he heard them.

Their time being served at the deli is a short one in anyone’s day, but Wyss tries to make it a meaningful one. It certainly has meaning for him. Several years ago, someone shared a story at a staff meeting that stuck with Wyss. It’s the famous story of President Kennedy touring the NASA space center. At some point Kennedy sees a janitor and asks him what he’s doing. The janitor replies, “I’m putting a man on the moon.”

Wyss doesn’t teach in a classroom. No matter. “I help make successful students,” he says. “I’m not the only one, but that’s what I do.”

And the students notice him for it. Wyss has been invited to graduations. When he’s on campus during the evening to attend a concert or an event, he’ll have students walk by, smile and say, “Hi, Fred.”

“They’re recognizing me, and I think it’s because I’ve served them well,” Wyss says. “I’m an ordinary person doing an extraordinary job, and it’s a gift from God.”
Rebecca Ballew has worked at Mizzou since 1999 and in the Division of Biological Sciences since 2014.

An executive assistant to John C. Walker, director of biological science, Ballew manages his calendar and travel for the department, does MyVita reporting and updating for faculty members, handles classroom and conference room reservations, creates itineraries for invited speakers and guests. She also works as a liaison for the Alumni Leadership Board, helps graduate students plan a weekly seminar series, serves as the backup building coordinator and runs the division’s social media accounts. And if something needs doing that isn’t on the list, she does that, too.

“I give the support that the faculty and graduate students need to make their research or whatever they’re doing easier,” Ballew says. “I wake up every day looking forward to going to work. Every day is different, but everyone is always very appreciative of what we do.”

Something that earned her appreciativeness from graduate students is the small lounge space she recently helped secure for them.

“They didn’t have a dedicated space for meetings or a break room — the only place they had to go was in their labs,” Ballew says. They’re under stress, and she wanted them to have a place where they could decompress. “Things like this help their day and help the department in the long run.”

Ballew has also helped rebuild the Arts and Science Staff Network. Membership had dwindled so far that the group couldn’t field a full governing board. Ballew worked with Dean Pat Okker to reinvigorate the group and put together a full board for the first time in years. They meet monthly with Okker to raise concerns and suggest opportunities. “She can use it as a sounding board and make the staff feel appreciated and that they have a voice,” Ballew says.

The mindset of seeing needs and meeting them is one Ballew grew up with. Her parents took in foster children during her childhood. Stray animals as well. “They were always there to help anyone, especially the vulnerable,” she says.

She has followed in their footsteps, taking in two foster children of her own — both are in college now and doing well — and the occasional animal that needs nurturing.

“That was how I was raised,” Ballew says. “We are in a position to help and can’t stand by and do nothing.”
There’s an art and a science to piano tuning. It takes a good ear, attention to detail and just the right touch.

Lucy Urlacher has been tuning pianos for 38 years, the last 10 for the School of Music. The school’s director, Julia Gaines, marvels at the quality of Urlacher’s work. “Our pianos have never sounded as good or been in as great a shape as they have been with Lucy,” Gaines says.

Urlacher has had an ear for music since childhood. It was a problem, actually. She was always the first to notice that the home piano sounded off. She’d ask her mother to call the tuner, but her mom wouldn’t pay $16 to fix a problem she couldn’t hear yet. Urlacher couldn’t wait. She’d call the tuner and, using 32 hours of babysitting money, pay the bill herself.

That theme repeated after college. She took music teaching jobs in two parochial schools in Kansas City, Kansas. Her frequent tuning requests went unheeded, so she decided to learn herself. She got a how-to book from the library and became an apprentice of sorts to a semi-retired piano tuner. As she learned, she took on side work. Before long, she quit teaching to tune full time.

Urlacher makes macro adjustments using an electronic tuner, but she trusts only her ear for final touches. She uses a tuning hammer (which, ironically, works like a wrench) to wind the high-tension piano strings into their proper place. But once you let go, the string rolls back a bit. Urlacher has mastered how to apply just enough extra tension so the strings roll back exactly where they ought to be.

She assiduously replaces worn leather or felt pieces, ensuring consistent play and sound. She likens herself to a tire repairman working the Indy 500 — she goes through a lot of felt and leather.

As a side project, she also rebuilt the school’s celesta, a keyboard instrument that makes a bell-like sound, saving the school nearly $50,000 over the cost of replacing it.

Urlacher takes pride in her role and is honored by her award. “As staff, we have to work in the background so much, so when people recognize you, it’s pretty amazing.”

MU SERVICE CHAMPION AWARD RECIPIENTS

May 2017 – Cynthia Irsik
June 2017 – Brittney Stevenson
July 2017 – Caroles Taylor
August 2017 – Marybeth Bohn
September 2017 – April Mason
October 2017 – Miriam Cullimore
November 2017 – Sylvia Jauregui
December 2017 – Sharon Gaughan
January 2018 – Taylor Yeagle
February 2018 – Sonya Thiessen
March 2018 – Alexander Jurkevich
April 2018 – Veronica Salmons

Thank you to our MU Service Champion Award sponsors:

Mary Wood
James Young
WHO IS THE STAFF ADVISORY COUNCIL (SAC)?

The council consists of 16 members elected by MU staff and includes representation from the following groups:

• (A/P) administrative/professional, which includes exempt nonacademic administrative professional and managerial staff;
• (T/P) technical/paraprofessional, which includes nonexempt staff and positions requiring specialized knowledge or skills acquired through experience, technical or other training;
• (C/O) clerical/office, which includes office staff designated nonexempt and not considered technical;
• (C/M) crafts/maintenance, which includes nonexempt skilled, semiskilled and apprenticed crafts, trades staff and service staff.

Staff Advisory Council was formed in 1978 by then-Chancellor Barbara Uehling. The mission of the council is to advise the chancellor on matters of mutual interest to MU staff; provide an appropriate and effective channel for bringing staff concerns and interests to campus administration; act as liaison for staff and administration on matters initiated by staff or by the council; and heighten awareness of contributions made by staff members.

CURRENT STAFF COUNCIL MEMBERS

Elizabeth Beal, Vice-Chair
Physical Therapy Dept., School of Health Professions

Dayla Botts, Secretary/Treasurer
Student Affairs Business Center

Sean Brown
Campus Dining Services

Tammy Browning
Division of Information Technology

Hannah Clampitt
Office of Sponsored Programs Administration

Eric Henley
Facility Operations

Melissa Ingram
Mizzou Online

Jan Judy-March
Biochemistry

Chrissy Kintner, Chair
VP Enrollment Management

Julie Loftin
Student Financial Aid

Ronnie Moten
Campus Dining Services

Rachel Powers
Student Health Center

Brad Sharp
Energy Management

W. Steve Stockman
Facility Operations

Megan Thompson
Environmental Health & Safety

Liz Zufall
Office for Civil Rights & Title IX
